Probity Mining 2023 Short Duration Flow-Through Limited Partnership

2023 Annual Management Report of Fund Performance

This semi-annual management report of fund performance contains financial highlights but does not contain the complete semi-annual financial statements of Probity Mining 2023 Short Duration Flow-Through Limited Partnership (the “Partnership”). You can get a copy of the financial statements at no cost in the following ways; by calling Qwest Investment Fund Management Ltd. (the “Manager”) at (604) 602-1142 or 1-866-602-1142; by writing to the Manager at, Suite 702, 1030 West Georgia Street, Vancouver, BC V6E 2Y3; by e-mailing the Manager at info@qwestfunds.com; or by viewing the information on SEDAR at www.sedar.com.

Securityholders may also contact the Manager to request a copy of the Partnership’s proxy voting policies and procedures, proxy voting disclosure records, or quarterly portfolio disclosures.

Management Discussion of Fund Performance

Results of Operations

The Partnership commenced operations on February 14, 2023. During the period ended December 31, 2023, the Partnership issued 342,185 Class A – National Class units, 20,900 Class A – British Columbia units, 162,080 Class A – Quebec units, 140,850 Class F – National Class units, 7,500 Class F – British Columbia units, 11,600 Class F – Quebec units, and 1 Class P unit. As at December 31, 2023, all classes of units issued were outstanding.

Total expenses incurred by the Partnership for the period from commencement of operations on February 14, 2023 to December 31, 2023 were \$1,077,412, comprised mainly of \$735,296 in issue costs, \$119,185 in administrative fees, \$88,702 in legal fees, \$42,000 in audit fees and \$24,150 in fund manager Fee.

Unrealized depreciation of investments for the period ended December 31, 2023 was \$ 723,327.

At December 31, 2023, net assets attributable to Limited Partners for Class A – National Class units was \$ 2,236,198 or \$ 6.54 per unit, for Class A – British Columbia units was \$ 192,615 or \$ 9.22 per unit, for Class A – Quebec units was \$ 767,557 or \$ 4.74 per unit, for Class F – National Class units was \$ 962,830 or \$ 6.84 per unit, for Class F – British Columbia units was \$ 70,862 or \$9.45 per unit, and for Class F – Quebec units was \$ 57,851 or \$ 4.99 per unit.

Recent Developments

The tracked commodities and the S&P/TSX Venture Metals and Mining Index exhibited volatility and diverse performance trends in 2023. The venture index declined by 9%, reflecting the scarcity of risky capital after posting positive gains in the first six months of the year. Meanwhile in the commodities complex, Gold, Copper, and Uranium were up 13%, 2% and 86%, while battery metals; Lithium, and Nickel declined by 81% and 45%, respectively.

In December, the Federal Reserve held the Fed funds rate steady in the range of 5.25%-5.50% signaling the possibility of a soft landing for the economic cycle. While the pause was somewhat anticipated, the Fed’s dovish 2024 outlook on interest rates invited risky capital back into the financial markets. This sent the equity markets soaring with some indices nearing or marking all-time highs. The Federal Open Markets Committee (FOMC) improved its inflation outlook for 2024. And while the 2023 GDP growth outlook has improved, the FOMC anticipates a slowdown in 2024. Despite the upbeat statements, the Fed, however, did not completely rule out a recession or interest rate hikes next year. The European Central Bank (ECB) and the Bank of England (BoE) also paused interest rate hikes at their most recent policy meetings. While the ECB also lowered its inflation forecasts, both central banks were less dovish on their policy outlooks than their US counterparts.

According to Reuters, global electric vehicle sales grew by 31% in 2023 despite concerns about softer demand because of the Chinese subsidies ending in December of 2022. Battery manufacturers have been reducing production due to those concerns in 2023. Indicators of a weakening global economy, fears of a recession and in some cases, robust supply have also contributed to lower demand for battery metals and subsequent price performance in 2023.

Probity Mining 2023 Short Duration Flow-Through Limited Partnership

2023 Annual Management Report of Fund Performance

Recent Developments (continued)

In the near term, global economic growth is likely to continue to be challenged by high inflation, geopolitical tensions and China's sputtering economy. These challenges are likely to put pressure on commodity prices in 2024. However, the urgency to combat climate change through global initiatives should translate into increased demand for "Green Metals" which include copper, nickel, cobalt, and lithium, amongst others. This increased demand could provide some pricing support for these metals. Despite the near-term challenges, the Investment Advisor and Fund Manager believes we are in a secular bull market for industrial commodities as they are needed to achieve the long-term global decarbonization goals.

While inflation is showing some signs of stabilization, it remains at elevated levels. Despite progress in Central banks' efforts at controlling inflation, they are also slowing down the global economy. The Investment Advisor and Fund Manager believes that economic and geopolitical uncertainty coupled with inflation pressures should cause gold to outperform other asset classes over the medium term. However, implementing monetary tightening programs will likely be measured and muted by the challenge of avoiding a possible recession. Thus, volatility in the gold price is expected in the near term. Gold is generally seen as a haven in times of economic and geopolitical uncertainty.

As for Uranium, advancements in nuclear power utilization should support the commodity's price, although short-term trading may create volatility due to ongoing disruptions in Russian uranium supply and low trading volumes determining the spot price.

The limited partnership's exploration investments provide exposure to various commodities, with the most significant exposure being in gold. In 2023, exploration expenditures and deposit appraisals for precious metals (primarily gold) are expected to account for over 50% of total expenses in Canada. Spending on critical minerals exploration is expected to have increased significantly in 2023.

According to the Government of Canada, spending on Canadian exploration and deposit appraisals is expected to reach \$4.3 billion in 2023. However, due to economic uncertainty and concerns of a recession, this is lower than spending in 2022 of \$4.4 billion, but remains high compared to historical standards. In April 2022, the government announced a doubling of the mineral exploration tax credit to 30% for targeted critical minerals. Additionally, the first critical minerals strategy includes initiatives totaling \$3.8 billion over the next seven years, focusing on nickel, copper, cobalt, rare earth elements, and uranium.

⁽¹⁾ This information is derived from the Partnership's December 31, 2023 audited financial statements. The net assets per security presented in the financial statements differs from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.

⁽²⁾ The Partnership is a closed-end partnership and no additional units can be issued after the completion of the final closing. In addition, no Partnership units can be redeemed until the time of dissolution of the Partnership. As a result, the units issued and outstanding as of the completion of the final closing were used to calculate the net assets attributable to limited partners as at December 31, 2023 and the increase (decrease) from operations for the period from commencement on February 14, 2023 to December 31, 2023.

Ratios and Supplemental Data (continued)

Class F - British Columbia	December 31, 2023
Total net asset value (000's)	\$71
Number of mutual fund shares outstanding	7,500
Management expense ratio ⁽¹⁾	5.66%
Management expense ratio before absorption (1)	5.66%
Portfolio turnover rate ⁽²⁾	0.35%
Trading expense ratio ⁽³⁾	0.20%
Net asset value per share	\$9.45

Class F - Quebec	December 31, 2023
Total net asset value (000's)	\$58
Number of mutual fund shares outstanding	11,600
Management expense ratio ⁽¹⁾	10.60%
Management expense ratio before absorption (1)	10.60%
Portfolio turnover rate ⁽²⁾	0.35%
Trading expense ratio ⁽³⁾	0.20%
Net asset value per share	\$4.99

⁽¹⁾ Management expense ratio ("MER") is based on total expenses less commissions for the stated period and is expressed as an annualized percentage of monthly average net assets during the period.

⁽²⁾ The portfolio turnover rate indicates how actively the Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Partnership buying and selling all the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate is in a period, the greater the trading costs payable by the Partnership in the period, and the greater the chance of an investor receiving taxable capital gain in the period. There is not necessarily a relationship between turnover rate and the performance of a portfolio.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as a percentage of average net assets during the period.

Management Fees

There is no management fees.

Caution Regarding Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts, but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is a significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Partnership may invest in and the risks detailed from time to time in the Fund's simplified prospectus. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, management of the Partnership does not undertake, and specifically disclaims any intention or obligation to update or revise any forward-looking statements, future events or otherwise, unless required by applicable law.
